

# PRODUCT INFORMATION

## COIL & DUCT SPRAY

H-9532, H-9501

U.S. EPA Registered for HVAC use

### Fungistat • Bacteriostat • Germistat • Deodorizer

**Coil & Duct Spray** is specially designed and registered by the U.S. Environmental Protection Agency for use in treating HVAC system duct work, evaporator coils, drip pans, and other associated air conditioning components.

By utilizing an optimized concentration of chlorine dioxide, **Coil & Duct Spray** provides a highly effective, low toxicity solution for eliminating odor-causing microorganisms. Chlorine dioxide is a powerful antimicrobial compound effective against a broad range of both gram-positive and gram-negative organisms as well as yeasts and molds.

**Coil & Duct Spray** eliminates odors at their source through a point-of-contact, chlorine dioxide release process that destroys organisms at their origin. This unique process eliminates odors without the use of any perfumes or masking agents.

**Coil & Duct Spray** has earned a Category III, low toxicity rating from the U.S. EPA, requiring a precautionary signal word of "Caution" as compared to "Warning" or "Danger" found on other products. As a result, **Coil & Duct Spray** is safe to use, even in occupied spaces if necessary.

Apply a liberal and undiluted amount of **Coil & Duct Spray** by directly spraying on contaminated areas or misting into system intake, while fan is running. **Coil & Duct Spray** is also effectively applied by using an atomizer, such as the **Hydro-Balance Fogger**, H-FG01.

- Easy to Apply
- Point-of-Contact Microbial Control
- No Rinsing
- No Activation Required
- No Perfumes or Masking Agents
- No Alcohol
- Low Toxicity
- Excellent Safety Rating
